Sodomite bishop undergoes treatment for alcoholism

The first openly sodomite bishop of the Episcopal Church in USA, Gene Robinson, is being treated for alcoholism.

A key administrative committee of the church said it stood by Robinson, whose 2003 election as bishop of New Hampshire caused a furore in worldwide Anglicanism because he lives with a same-sex partner.

E-mail

Gene Robinson — a drunken pervert!

In an e-mail to friends and supporters, Robinson said: "I am writing to you from an alcohol treatment center where on February 1, with the encouragement and support of my partner, daughters and colleagues, I checked myself in to deal with my increasing dependence on alcohol," Robinson wrote in an e-mail to fellow episcopal clerics.

In his e-mail, Robinson, 58, went on to say that he has been dealing with alcoholism for years and had considered it "as a failure of will or discipline on my part, rather than a disease over which my particular body simply has no control, except to stop drinking altogether."

Robinson indicated he plans to return to work soon.

"I eagerly look forward to continuing my recovery in your midst," he wrote.

Parody

What a parody of the true Church of Christ is that amalgam which has as one of its leaders a man who is both a sodomite and an alcoholic.

The phrase "Hell on earth" seems more appropriate than 'church'!
