Republicans concerned about fireworks!!!!!!

Sinn Fein Northern Ireland Assembly Member, Francie Molloy, has called upon shop owners to be careful to whom they sell fireworks lest innocent children are injured.

That is rich coming from a representative of an organisation that imported and manufactured hundreds of tonnes of high explosives and hundreds of guns with the sole purpose of murdering, maiming and mutilating innocent victims whom they deemed stood in the way of their coming to power.

It is not that such a concern heralds a new day of civilised behaviour from Sinn Fein/IRA, for such a new day would have, as the very first indication of its dawn, some indication of remorse over their evil campaign of terror which left thousands dead and crippled, and a swift move to rid themselves of the weapons of terror. There is no remorse and no disarming.

Francie Molloy is vainly seeking to create the myth that republicans care about normal things. Were it not so serious, it would make a cat laugh!
